YASH WAGHADHARE

Full-Stack Software Engineer | portfolio/yashwaghadhare
+919067228636 | contact.yashwaghadhare@gmail.com | linkedin.com/in/yashwaghadhare | github.com/yashwaghadhare/

SUMMARY

Full-stack engineer building web and mobile apps in Python, React, Angular, Flutter and .NET since June 2023. Strong on REST APIs, MySQL tuning and keeping live systems stable, across ERP, CRM, e-commerce and marketplace products.

SKILLS

Frontend: React.js, Next.js, Angular, JavaScript, HTML, CSS, Bootstrap
Backend: Python, FastAPI, .NET Web API, REST APIs, API integration
Mobile: Flutter, Firebase
Databases: MySQL, SQL Server (SSMS)
Tools: Git, GitHub, Jira, Postman, Zoho, Power BI

EXPERIENCE

Engineer II, OnesNZeros Tech Solutions Pvt. Ltd. *Apr 2025 – Present*

- Build and maintain business apps in Python, React.js and MySQL, from requirements through release and post-launch support.
- Design REST APIs and connect them to React frontends for day-to-day business workflows.
- Speed up APIs by reworking endpoint logic and slow MySQL queries.
- Fix production bugs and add security improvements to live applications.
- Handle testing, release validation, deployment and post-release support.

Software Engineer, Aaryak Solutions Pvt. Ltd. *Jun 2023 – Apr 2025*

- Introduced Flutter to the company and helped ship 5+ production apps.
- Built web and mobile apps with Angular, Flutter, .NET Web API and Python, plus the backend APIs behind them.
- Improved API design and MySQL queries to speed up key screens.
- Mentored junior developers; team productivity and code quality rose about 25%.

PROJECTS

OnesNZeros Tech Solutions

WhatsApp CRM Platform | *MySQL, WhatsApp Business API, REST APIs, PWA*

- Added unified inbox, media messages, interactive buttons, labels, filters, chatbots, campaigns, follow-ups and mobile APIs.
- Shipped OTP verification, rate limiting, authentication fixes and automated backups.

Pharmaceutical ERP System | *MySQL, Database and Server Management*

- Stabilised store, purchase, finished goods, QC and packaging modules; fixed bugs, reports and label/MRP printing.
- Handled server migration, backups, CDC workflows, audit logging, currency selection and maintenance mode.

Service Marketplace Platform | *Python, FastAPI, React.js, Next.js, MySQL*

- Worked on authentication, professional onboarding, bookings, payments, chat, dispute handling and PWA features.

Online Examination Portal | *Python, React.js, MySQL*

- Built exam creation, secure APIs, ranking logic, analytics dashboards, image uploads and report generation.

Aaryak Solutions

E-commerce Website (PWA) | *Angular.js, .NET Web API, MySQL*

- Built customer and admin modules for products, pricing, cart, checkout and orders, along with the backend APIs.

Food Delivery App: Ionic to Flutter Migration | *Flutter, Firebase*

- Rebuilt screens and flows in Flutter while keeping the existing business logic, then connected it to backend APIs.

Marathon-Moments | *ASP.NET, Google Vision API, MySQL*

- Processes event photos in bulk and reads bib numbers with Google Vision, so runners can search for their own pictures.
- Stores photo metadata in MySQL and supports search by bib number.

ACHIEVEMENTS

- **Innovator of the Year** – Aaryak Solutions Pvt. Ltd., for technical contributions and introducing Flutter-based development.
- **Best Employee of the Quarter** – OnesNZeros Tech Solutions Pvt. Ltd.
- Contributed to the delivery of 5+ production-ready Flutter applications.
- Mentored junior developers and supported code quality and team productivity improvements.

EDUCATION

M.Sc. Data Science *Jun 2025 – Present*

- Postgraduate study alongside work, focused on Python data processing, analytics and applied machine learning.

B.Sc. Information Technology, University of Mumbai *Jun 2020 – May 2023*

- Covered full-stack development, databases and system design.
